

JavaScript Logic Building Projects Roadmap

Follow the projects in order. Focus on understanding the logic, not memorizing the code.

Level 1 – DOM & Events

1. Counter App
2. Color Changer
3. Digital Clock
4. Random Background Color Generator
5. BMI Calculator
6. Age Calculator
7. Tip Calculator
8. Character Counter
9. Password Show/Hide
10. Random Quote Generator

Level 2 – JavaScript Logic

1. Number Guessing Game
2. Rock Paper Scissors
3. Dice Roller
4. Coin Flip Simulator
5. Temperature Converter
6. Palindrome Checker
7. Vowel Counter
8. Word Counter
9. Calculator
10. Multiplication Table Generator

Level 3 – Arrays + DOM

1. To-Do App
2. Notes App
3. Expense Tracker
4. Shopping List
5. Student Management System

Level 4 – Timers

1. Stopwatch
2. Countdown Timer
3. Pomodoro Timer

Level 5 – Advanced Logic

1. Quiz App
2. Tic Tac Toe

Level 6 – API Projects

1. Weather App
2. GitHub User Finder
3. Random Joke Generator
4. Movie Search App
5. Currency Converter

Level 7 – Advanced Projects

1. Kanban Board
2. Memory Card Game
3. Snake Game
4. Music Player
5. Chat UI (Frontend Only)

Practice Rules

1. Write the project logic on paper before coding.
2. Try solving the problem yourself for 30–45 minutes before asking for help.
3. Ask for hints instead of complete code.
4. Rebuild each project on Day 2 and again on Day 7 without looking at the code.
5. Add at least one new feature to every project.
